EXPERIENCES

OsOO «TeremPAY» (Kyrgyzstan) 2012 - 2019

- Stack: JavaEE, SpringBoot, C++ (Qt), JavaScript, Python, Bash, PostgreSQL, Docker, Graylog2, Linux
- Developed a payment system, implemented and ensured its smooth operation
- Wrote from scratch an application for self-service terminals (Business logic, work with equipment, communication with the server)
- Created several interfaces: Web, SMS gate, API, self service terminals API
- As the load increased, performed horizontal scaling of the system by splitting the monolith into microservices
- Ensured uninterrupted operation of the system with a load of more than 2000 terminals

Project: Online Radio. (coldstar.online) 2022

- Stack: Python, FastApi, ReactJS, Docker, PostgreSQL
- I developed an application by dividing it into modules, using a microservice architecture, thus streaming, queuing, monitoring and api modules are independent of each other
- Made layout according to my own design
- Continuous integration with Gitea and Drone

Project: Website for design interior studio. (shaini.kg) 2020

- Stack: Python, Flask, Directus, Gulp
- Independently designed, implemented and set up continuous integration using Gitea and Drone
- Headless CMS were used for content management
- Created telegram bot that downloads and saves 3D models from 3ddd.ru website

ОБРАЗОВАНИЕ

Kyrgyz Russian Slavic University 2004 - 2008 / 2012 - 2015

- Specialty: *Software for Computers and Computer-Aided Systems*
- Full-time, then distance learning
- Final exams and graduate work were passed with excellent mark
